

CORE SCHEDULE

People ✦ Essential

Free use of Vaccine Clinic Rostering Module for HHSs

Core Schedule is the leading agile roster system for people in healthcare.

It is widely used across Australia, New Zealand and the United States.

We are making our standard Vaccine Clinic Rostering Module available at no charge* to all Hospital + Health Services managing COVID-19 vaccination hubs.

With Core Schedule you can:

- Centrally coordinate the rosters across multiple locations
- Easily ensure that all required positions are filled (RN, vaccinator, support)
- Have staff sign in and pick up available shifts and/or confirm availability
- SMS confirmations for all shifts and group messaging for filling roster gaps
- Safety Scan to ensure safe working conditions and Award compliance
- Built in workflows and reporting keep everything transparent and well-managed.

Core Schedule is committed to keeping Australia safe and we want to support our local HHSs in any way we can to help manage the COVID-19 Pandemic in a meaningful way.

**The standard module comes with training and assistance to help get you up and running and is a viable and functioning roster tool for managing a staff roster in a Vaccine Clinic. It is not a full deployment of Core Schedule and does not include any additional tailoring or customisation. If you have multiple rosters across multiple clinics, please talk to us about the best way to set them up and to determine if there are other costs involved.*

For more information or to get started with the free software for your clinic, please contact vaughan@coreschedule.com - 0408 949 118 or jasmin@coreschedule.com - 0404 128 592
